SUMMARY

Innovative, task-driven professional with more than five years of experience in web design and development. Equipped with a record of success in consistently identifying and providing the technological needs of companies through ingenious innovation. Proficient in developing user interfaces, and APIs, troubleshooting complex/straightforward issues, and implementing new features based on user feedback.

SKILLS

- JavaScript
- ReactJS and Redux
- CSS3, SCSS & LESS
- AngularJS and Angular14+
- Jest
- D3.js
- MongoDB
- Express and Node JS
- Git/GitHub
- AWS
- Tailwind and Bootstrap
- GraphQL

WORK EXPERIENCE

Longbow Advantage - Mississauga

UI Developer • 26th September 2022 - 8th May 2023

- Worked with Product Development Manager on the product's feature development and bug resolution.
- Maintained stylesheets and created optimizations in legacy AngularJS components.
- Developed test cases for backend services using Jest.
- Implemented pre-commit hooks for the front-end repository to maintain code standards.
- The technologies used were Javascript, Typescript, SCSS, Angular/JS, SQL, MongoDB, Express, and GraphQL.

Media.net Software Services - Mumbai

Senior UI Developer • 6th August 2019 - 30th April 2021

- Optimized several functionalities using vanilla JavaScript.
- Created a new set of custom implementations using SCSS and JavaScript and trained other developers to use and implement those.
- Worked on an internal dashboard tool (Datachimp) using ReactJS for front-end, Redux for state management, and Jest for writing test cases.
- Contributed to developing new features and improvements of another dashboard (Console) using Angular 6+ for front-end and Express for implementing services.
- Participated in code reviews and mentoring new joiners.

Accenture Solutions - Mumbai

Web Developer • 1st October 2018 - 5th August 2019

- Implemented and maintained websites for Sanofi, a renowned pharmaceutical company, using Sitecore.
- Contributed to the continuous improvement of software development by participating in brainstorming sessions with the tech lead.
- The technologies used were Sitecore, JQuery, and HTML/LESS.

Media.net Software Services - Mumbai

Jr. UI Developer • 9th May 2016 - 28th September 2018

- Implemented various ad units, e.g., keyword ad blocks, interstitials, and SERPs (Search Engine Result Pages), while providing cross-browser support.
- Developed marketing material, e.g., landing, thank you pages, and product dashboards for browser extensions. Git was used as a code repository.
- The technologies used were HTML, CSS, and JavaScript.

EDUCATION

Post Graduation in Web Design and Development

Conestoga College (Canada) • 2021–2022 • 3.92 GPA

Bachelors in Computer Engineering

University of Mumbai • 2012–2015
