WORK HISTORY

Senior UI Developer

Media.net Software Services - Mumbai

6th August 2019 - 30th April 2021

After working with Accenture for a period of about 10 months, I came back to the same project (2nd project mentioned below) in Media.net.

I was responsible for writing optimized code for several implementations using vanilla Javascript. In December 2020, I was shifted to a different project along with my whole team. This new project was about Customer Acquisition and my job was to enhance the already built dashboard using AngularJS. This dashboard was implemented to simplify the day-to-day tasks of the team, like mapping templates to a particular URL monitor various aspects of a flow.
