2015

WORK HISTORY

Senior UI Developer

Media.net Software Services - Mumbai
6th August 2019 - 30th April 2021
My role at Media.net included: -
• Writing optimized code for several implementations using vanilla Javascript.
• Work on an internal dashboard tool using ReactJS. The backend was built in MongoDB.
• In December 2020, I was shifted to a different project along with my whole team. This new project was about Customer Acquisition and my job was to enhance the already built dashboard using AngularJS. The backend was built in SQL. This dashboard was implemented to simplify the day-to-day tasks of the team, like mapping templates to URLs and monitoring various aspects of flows.

Web Developer

Accenture Solutions - Mumbai
1st October 2018 - 5th August 2019
 My role at Accenture Solutions included: -
• Working with multiple stakeholders.
• Implementing and maintaining websites for Sanofi, a renowned pharmaceutical company using Sitecore.
• Technologies used were Sitecore, JQuery, HTML/LESS.

UI Developer

Media.net Software Services - Mumbai
9th May 2016 - 28th September 2018
My role at Media.net Software Services included: -
• Implemented various ad units like keyword ad blocks, interstitials, and SERPs(Search Engine Result Pages) providing cross-browser support.
• Implemented marketing material like landing and thank you pages and also implemented the product pages for Chrome, Firefox, Safari, and InternetExplorer extensions.
• The technologies used were HTML, CSS, and JavaScript
• Within my tenure at Media.net, I also worked on 2 personal projects to ease the daily work to some extent. I used JQuery for these projects.
