Year: April 2022 (Currently studying in last semester)

Degree: **B. E.**
Area: Computer Engineering
Institute: University of Mumbai
College: Y. T. I. E. T
Year: April 2015

Degree: **Diploma**
Area: Computer engineering
Institute: Maharashtra State Board of Technical Education
College: S.H. Jondhale
Year: March 2012

Degree: **HSC**
Institute: Mumbai University
School: Abhinav Vidyalay Jr. college
Year: March 2008

Degree: **SSC**
Institute: Mumbai University
School: Abhinav Vidyalay Jr. college
Year: March 2006

Work Experience

Media.net Software Services: 9th May 2016 to 28th September 2018
Accenture Solutions: 1st October 2018 to 5th August 2019
Media.net Software Services: 6th August to 30th April 2021

Roles and Responsibility

Organization Name: Media.net Software Services
Designation: UI Developer
Tenure: 9th May 2016 to 28th September 2018

Media.net is a leading global advertising company with one of the most comprehensive portfolios of advertising technology in the industry across search, native, display, mobile, local, products and video.

My role at **Media.net Software Services** included: -
- Worked as UI Developer for more than 2 years.
- Implemented various ad units like keyword ad blocks, interstitials and SERPs(Search Engine Result Pages).
- Implemented marketing material for Chrome, Firefox, Safari and Internet Explorer extensions.
- Within my tenure at Media.net, I also worked on 2 personal projects to ease the daily work to some extent.

Project Details:

At Media.net I've worked on 2 different projects.
First one includes the implementation of contextual advertisement material like mentioned above (keyword ad blocks, imagizers, ads only units, interstitials and SERPs). I was working on this project for a year and the team size was 20 which included UI Developers and Quality Analyst.

My Second project included implementation of marketing materials for the extensions on browsers like Chrome, Firefox, Safari and Internet Explorers. The marketing material consist of landing, cross-promotional landing and Thankyou pages. Along with these, I've also implemented the interfaces for extensions. My work on this project consisted of implementing various other functionalities like autocomplete and API integration to fetch given data.

I've implemented 2 personal projects to ease the daily work.
First one is integration of google sheet API which will take the data from given google sheet and display it in cards layout. This was implemented to segregate daily tasks under various categories like, team, developers working on it and priority.
The other is a chrome extension which will help a developer to figure out how many characters are fitting into the keyword block being implemented. Technology used for these projects is Jquery.

Organization Name: Accenture Solutions
Designation: Web Developer
Tenure: 1st October 2018 to 5th August 2019

Accenture is a global management consulting and professional services firm that provides strategy, consulting, digital, technology and operations services. A Fortune Global 500 company, it has been incorporated in Dublin, Ireland, since 1 September 2009.

My role at Accenture Solutions includes: -
- Working as Web Developer.
- Implementing and maintaining websites for Sanofi, a renowned pharmaceutical company.

Project Details:

At Accenture I was working for a client named Sanofi, a French multinational pharmaceutical company. My job included implementing and maintaining websites by working together with a group of clients, project managers, quality analysts and other developers around the globe. Technologies used were LESS, CSS, HTML, Jquery, Sitecore and HandlebarJS.

Organization Name: Media.net Software Services
Designation: Senior UI Developer
Tenure: 6th August 2019 to 30th April 2021

After working with Accenture for a period of about 10 months, I came back to the same project (2nd project mentioned above) in Media.net. While re-joining the same team, I realized that this particular profile is helping me to boost my knowledge in the direction I desire.
During this time, I was also working on a dashboard which was implemented using ReactJS and I was responsible for styling the components and making them responsive for all the screen sizes using SCSS. This dashboard was used to track progress and performance of various products. So, in order to show various graphs, Ant Design was used.

I was also responsible for writing optimized code for several implementations using vanilla JavaScript.

In December 2020, I was shifted to a different project along with my whole team. This new project was about Customer Acquisition and my job was to enhance already built dashboard using AngularJS. This dashboard was implemented to simplify day-to-day tasks of the team, like mapping templates to a particular URL monitor various aspects of a flow.

Personal Details

Date of Birth:	- 1st November , 1990
Gender:	- Male
Marital Status:	- Single
